DEVYSSON CARDOSO

BACKEND DEVELOPER

Backend Developer with experience in Java and Spring Boot, specializing in building scalable REST APIs and robust backend solutions. Proficient in relational databases like MySQL and skilled in frontend technologies such as Angular.

EXPERIENCE

Freelancer

FULLSTACK DEVELOPER
September 2024 - Present

Project: **Contratto+ (Project link)**

- I am working alone on a project that consists of a platform for generating contracts for small business owners and enabling their electronic signature.
- I am responsible for everything from UI design to front-end and back-end implementation.
- I used Angular for the frontend and Spring Boot for the backend. In addition to MySQL in the database.
- I learned how to authenticate, generate PDF files, handle image manipulation and use electronic signature APIs.

Group university project

SEPTEMBER 2024 - DECEMBER 2024

Project: **AllAround (Project link)**

- In this project, we developed an application that connects domestic service professionals with potential customers.
- We use tools that have helped us a lot in group development, such as trello and git/github.
- For the project, we were asked to try to find a solution to help with Sustainable Development Goal 8, which aims to promote inclusive and sustainable economic growth, full and productive employment and decent work for all.

Freelancer

WEB DESIGNER
August 2022 - April 2023

- Developed and customized responsive websites using WordPress, focusing on user-friendly designs and optimizing performance for various devices.
